DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claim(s) 1-10 and 11-14 and 15-17; drawn to method of producing soy sour cream product, classified in class 426, subclass 44.

Group II, claim(s) 18-27 and 28-33 drawn to the products, i.e., the soy sour cream products, classified in class 426, subclass 634.

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

In the instant case the process of making soy sour cream and the product made:

Page 3

Art Unit: 1761

(1) In claims 1-10 and 11-14 and 15-17 the process as claimed can be used to make sour cream using any kind of milk.

(2) Claims 18-27 and 28-33 are drawn to the product that can be made by addition of one or more of the bacteria recited in the processes in group I. Alternatively, a soy sour cream product can also be made by using a store bought soy yogurt and making it sour by keeping at a room temperature or by adding food acid and further addition of fat or oil and homogenizing the mixture. Therefore, the products described in claims 18-33 can be made by other methods than the ones recited in claims 1-17.

The inventions are distinct, each from the other because of the following reasons:

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Chawla whose telephone number is (571) 272-8212. The examiner can normally be reached on 8:00 am to 4:30 pm.

Application/Control Number: 10/772,526 Page 4

Art Unit: 1761

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
